Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance.

Rates are calculated using the population for each subgroup shown; therefore, they will not add to the rate calculated for the total population.

Population breakdowns by gender will not add to total because of variations in population source data.

The "percent of population" category for male and female was calculated using the sum of the male and female populations.

<sup>1</sup> Beginning in 2004, population estimates are based on the 2000 Census. Previous population estimates are based on revisions of the 1990 Census. Readers are advised to exercise care in interpreting changes in percent and rate between decennial census samples.

<sup>2</sup> The "male" category includes homicide victims whose gender could not be determined: 1997 includes five, 2000 includes two, 2001 includes one, and 2002 includes one.
